To whom it may concern:

Carl Construction broke ground on construction of a wholesale warehouse/retail show house building in Bozeman, MT for MDM Supply in the spring of 2008. This project was a "design build, cost plus not to exceed" project. From the design phase all the way through to our Grand Opening, Carl Construction's professionalism and competency was evident. As with any design build, budget management is paramount to the success of the project. We are happy to note that even as challenges occurred onsite, the projected budget was adhered to and project scheduling was maintained. Simply put, Carl Construction was able to provide a quality building that exceeded our expectations on time and under budget.

Throughout the project Carl Construction remained flexible to work with and was very responsive when we approached them concerning any changes that needed to be made. This is a testament to the open channels of communication that Carl Construction maintained not only with us, the customer, but their subcontractors as well. In this case Contractor / Subcontractor relations were very important to us, as those subcontractors are in turn customers of ours.

Overall we strongly recommend and were very pleased with our total experience with Carl Construction. We would certainly use them again in the future when construction services are needed.

Sincerely,

Craig Skinn
