

To Whom It May Concern:

Fred Carl and Carl construction built commercial space for us to serve as our dental office with additional space for tenant lease. The design was somewhat unusual in that many features were "dental" specific. We wanted to bring in a lot of natural light while maintaining patient privacy. Much of the exterior appearance was the result of internal design. This along with all of the medical equipment considerations on the mechanical made it a demanding project. I can't tell you how pleased we were with the entire process, so much so that we asked Fred to build our new home two years later. We are similarly happy with our home. I have built three custom home and two offices in my life and they were by far the most caring and professional to work with.
